

Fuji Medical Instruments

Dear Ministers

Dear delegates and people of China.

*On my right side, Miss Sunshine Johansson,
Business coordinator between China and Sweden
Next to here, Mr. Magnus Rosén,
one of the most famous Bass guitar player in the world.*

*My name is Bjarne Karlsson.
I am a Doctor in Mechatronics and one of
the co-owners of FMI-Europe from
Gothenburg Sweden*

We are a partner and distributor of Fuji Cyber Relax Massage Chairs who are basically produced in Japan for more than 60 years. Together we are developing and distribute massage chairs that is Medically Certified by the Ministry of Health and Labor in Japan and in Europe. This proof the highest quality standards for medical treatment and relax.

Together with the world's famous Bass guitar player, Mr. Magnus Rosén, we have a concept with bass music therapy together with the massage chair in order to increase the treatment and rehabilitation from sickness. We have several hospitals and universities interested in our concept. Some of them presented research that showed healthy benefits while listening to bass music.

The combination of bass music and Fuji massage chairs are unique. Our own experience in Sweden shows that patients are able to reduce their use of pain medication. Increased mobility are also shown after treatment in a massage chair. Together with this calm and relaxing bass music that Mr. Rosén play I am convinced over the effect that this will have on your body and mind. We are cooperating with universities in Middle East and Sweden regarding music therapy and massage effects and we will of course look further into these reports. We have initialized research projects in Sultan Qaboos University in Oman, Sahlgrenska University Hospital in Gothenburg and the Royal Music Academy, Stockholm Sweden.

We would be very honored if we could start a cooperation between Sweden and China in order to shear this results of the music therapy projects and massage effect. I am convinced that we can improve treatment methods psychotherapy, rehabilitation etc. for effective health care. For example, in our primary study's we can recognize improvements regarding that the bass notes accelerates the healing process within the body's cells. This is improved by a study in Iran. In 2015 we will be happy to invite you to a conference in Stockholm, Sweden to discuss the influence from culture on the human brain.
